

# GRANUFLEX®

## ANIMAL WELFARE

**Comfortable  
and safe**

Horse lovers set great store by the well-being of their animals. The risk of leg injuries must be minimised, as must the likelihood of moisture under their hooves. Granuflex's robust and moisture-permeable mats have been specially designed for stables, horseboxes and, of course, walkways.

They are available in a variety of different thicknesses and colours. A bespoke tile has been specially developed for paddocks, with maximum damping and, importantly, pin/hole alignment. All this ensures the paddock floor remains perfectly in place, under all circumstances.

### WALKWAY 20MM
